GM Bret,

Finalizing the report and mailing out the final lab report letter to the residents is a priority for us. We are editing the second report draft now. We are shooting for a final report by 9/16. If we need to have it reviewed by the County Attorney's Office that would push back the date. I will keep you posted...Bob

Good Morning Bob,

Hope you had a good Labor Day weekend. Just wanted to check in with you regarding the sampling report. Do you have an estimate on when the report might be available. EPA is preparing its Administrative Record for the San Jacinto River Waste Pits site and would like to include your report in the record.

Thanks,
Bret

Hey Bob,

Is InControl Technologies going to provide you with a final report on the sampling of the wells in the San Jacinto Oaks and Lynchburg areas? If so, would it be possible for EPA to get a copy of that

9807436

report?

Thanks,

Bret Kendrick
